

CANS-NY Training & Technical Assistance Institute Impact Advisory Board

The Impact Board is charged with helping to guide the Institute's progress toward its mission.* The Impact Board consists of family members and youth with lived experience of care, executive leadership of agencies in New York State providing health home care management and/or technical assistance, and key stakeholders from the New York State Office of Mental Health (OMH), the New York State Office of Children and Family Services (OCFS), and the New York State Office of Alcoholism and Substance Abuse Services (OASAS), and the NYS DOH AIDS Institute. CANS-NY Institute leadership will provide regular email updates to the Impact Board about Institute progress and findings, and will coordinate one in-person and one web-hosted meeting of the Impact Board each year.

Impact Board members are asked to bring their knowledge of how the CANS-NY is being experienced by youth and families, how the CANS-NY is being used to guide care, and to provide input into what training and coaching supports are needed to increase effective use of the CANS-NY. Travel expenses for family and youth members will be paid for, and support for participation in web-based meetings (training, access to computer/high speed internet) will be provided if necessary.

**CANS-NY Technical Assistance Institute Mission: CANS-NY Technical Assistance Institute remains true supporting the State of New York Medicaid Redesign Team's vision for comprehensive, integrated care through training, coaching, and technical assistance in effective use of the CANS-NY as a collaborative assessment and treatment planning/monitoring tool.*

Membership
